BLUEBIRD'S RENTWORKS ENDORSED BY ACCESSIBLE VANS OF AMERICA

PRESS RELEASE

Dover, NJ USA. Bluebird Auto Rental Systems is pleased to announce its endorsement by Accessible Vans of America to launch *NetRent* across their dealership network in the United States. Dealers will login to Bluebird's NetRent servers in New Jersey via the Internet to access RentWorks software to manage all their rental transactions.

"In order to increase the productivity and profitability of our dealers, we want to encourage them to automate their operation. Bluebird Auto Rental Systems provides simple, easy-to-use software with outstanding training and support to back it up", says Dan Bussani, Vice President of Accessible Vans & Mobility of New York.

The first location to come online was in Mamaroneck, New York, a week after the rental manager attended a training class at Bluebird's headquarters in Dover.

"We are pleased to have Accessible Vans as our customer and look forward to a long and prosperous relationship together" says Angela Margolit, President of Bluebird Auto Rental Systems. "We pride ourselves on the ability to address and take care of the needs of any size fleet, no matter how simple or complex they may be."

RentWorks is a windows-based business management system for vehicle rental companies, running on Progress Software's Enterprise database.

About Accessible Vans of America

Founded in February of 1997, Accessible Vans of America, LLC. (AVA) is a member owned organization made up of independent Mobility Dealers across the United States who rent, sell and service wheelchair accessible vehicles. The purpose of this organization is to consistently provide its customers with the highest standards of product quality, safety and customer service found in the industry. AVA's primary

focus is the rental of wheelchair accessible vehicles. They have a nationwide network of dealers who can help with accessible vehicle rentals for business or pleasure.
