

Are you still trying

to reach people the old-fashioned way?

Bluebird Auto Rental Systems is proud to offer **BARSMail**, cutting edge E-mail (the “E” stands for EASY TO USE!) software that will dramatically simplify intra- and inter-office communications.

Save time and increase productivity with BARSMail, while you communicate easily with anyone on your Bluebird network! And BARSMail is fully integrated with RentWorks — if you have received any messages you will see the “**You Have New Mail**” message displayed in red along the bottom of the Main Menu screen.

Features:

- **Look up** your mail by date or sender.
- **View** any message on your screen.
- **Send** mail to individuals or groups – you can even send messages to yourself!
- **Forward On** or Reply To any message as you read it.
- **Create** groups, then add employees to them.
- **Print** any mail you have sent or received.
- **Mark** a message “Keep as New” so you will always be alerted that you have mail.
- **Create** a Return Receipt when the message is read.
- **Protect** your privacy – each user’s mail can only be accessed with a password.

Note: RentWorks version 2.1 or later is required to run BARSMail.
