

# ***Erez***

## ***with Integrated Hosting***

### ***RentWorks Version 4***

January 2018

1. **Erez** allows reservations to be made on your website which are then seamlessly added to your Bluebird database.
2. Your potential customers can:
  - Check real-time vehicle availability by class, location, date, and time.
  - View photographs of your fleet.
  - Select which miscellaneous charges and coverages they would like to purchase. You control which ones are offered from within the Bluebird software.
  - See the total estimated charges, including applicable taxes and fees.
  - Select the currency to be used to display amounts.
  - Enter their email address on the home page, which will automatically load their contact information.
  - Receive an email confirmation.
3. You can set up and control:
  - Which rates are offered from within the Bluebird software. Any rules attached to the rate are displayed.
  - Special Events and Rate Utilization to black out vehicles and rates.
4. **Erez** is written in WebSpeed, a Progress development language used for web-based transaction systems:
  - "WebSpeed Messenger" allows communication between a web site and a server hosting a Progress database. "WebSpeed Transaction Manager" intercepts the information from the messenger and communicates directly with the database.
  - You must have a permanent, dedicated connection between your RentWorks server and the Internet. The RentWorks server must have a static public IP address.
  - Your firewall must be capable of establishing a site-to-site VPN connection to our SonicWall firewall. If not, you must open ports 3050 and 3202 through 3502 for TCP/IP.
  - Your website can be hosted by the Internet Service Provider of your choice. Webspeed Messenger is hosted by Bluebird Auto Rental Systems. We will provide a link that your website will point to. Bluebird will handle all the Internet communication with your database.
5. The initial "*Getting Started*" Fee of \$895.00 includes:
  - Webspeed Messenger, hosted by Bluebird Auto Rental Systems.
  - Five (5) transaction agents in WebSpeed. This will allow approximately 30 simultaneous users to query the **RentWorks** database.
  - Support assistance getting started.
6. The fees for **Erez** are as follows:

- **\$3.75** for each honored reservation generated with Erez.
- **\$1.00** for each no-show reservation generated with Erez.
- The above fees will be calculated and invoiced on a monthly basis and automatically charged to a credit card.
- **Monthly hosting fees** for Webspeed Messenger and maintaining the Internet link to the RentWorks database. This fee also covers maintaining a security certificate for processing encrypted credit card transactions. These fees are based on the number of Erez administrative users as follows:

1-2 Users:	\$50
3-9 Users:	\$75
10-19 Users:	\$125
20+ Users:	\$225

7. All prices are quoted in U.S. Dollars and do not include applicable taxes, fees, or shipping charges.

These are some of our customers using Erez, along with their web sites:

A – A Auto Rental, Martha's Vineyard, MA: [www.mvautorental.com](http://www.mvautorental.com)
