

Put Car Rental in the Palm of the Renter's Hand!

Your customers can now book, rent and return vehicles with no need for any rental staff to be present.

Introducing...

The Bluebird PaaK (Phone-as-a-Key) Mobile App

No more waiting at the counter – renters can pick up and return cars 24x7!

Branded/Private Label Mobile App:

- Customers can make reservations without needing to go to your website
- Branded/Private Label Mobile App with your own company logo and information
- Inclusion in the Apple and Android Mobile App stores

Complete Backend Telematics Systems:

- Complete Phone-as-a-Key (PaaK) solution
- Transmits Check-In fuel level and odometer reading to RentWorks
- Locates vehicle on phone map
- Damage reporting

Simple Plug-in Solution via the Car Access Module (CAM):

- PaaK – For both passive (push-button start) and non-passive (key start)
- Easiest installation – Only one cable to the ODB port for passive start or two cables for non-passive start
- Smartphones communicate directly to the CAM via lightning fast Bluetooth
- Works in areas when cellular network is down or where no mobile cellular system is available, e.g. ten floors underground in a parking garage – direct Smartphone to vehicle via Bluetooth

Please contact us for more details.
