## **BLUEBIRD RELEASES MOBILE APP**

### **PRESS RELEASE**

Dover NJ USA. Bluebird Auto Rental Systems has officially released RentWorks Express, their Mobile App for renting vehicles and service loaners.

Written in the Progress Software's Telerik Kendo development environment, the screens were initially designed by the Progress UX (user experience) team. The primary goal was simplicity and ease of use.

The app is available in both Google Play (Android) and iTunes (iOS).

Car Rental reservations can be honored, and Dealership contracts can be created with the app. The key feature is the ability to capture and store customer initials and signatures directly on the screen. The rental agreement is then emailed to the renter.

"We are thrilled to be able to provide a mobile solution to those customers of ours who need to deliver a vehicle" stated Bluebird President, Angela Margolit. The industry has embraced the concept, and Bluebird's customer base is being encouraged to sign up for a trial period.

#### **About Bluebird Auto Rental Systems**

Bluebird Auto Rental Systems is a provider of robust and feature-rich software to vehicle rental operations worldwide. Bluebird is committed to keeping pace with technology in order to offer the most advanced line of products possible, as well as providing top-notch customer training and support.
