

Is your vehicle rental business missing a vital link?

The Corporate Reservation Link will save you time and money!

The Corporate Reservation Link allows reservations to be received from a centralized reservation center. The information is sent out via a secure Internet connection, which is connected directly to the server. When RentWorks processes the reservation, it automatically creates records in the Reservations, Customer, and Payment/Deposit Tables.

The Corporate Reservation Link features the ability to generate an audit trail from the reservation transmissions. A hard copy receipt can be printed of the exact image of the reservation transmissions as they are sent from the centralized reservation center. A log is also provided for the purpose of tracking all additions and changes to the Reservations File.
