

Make Your Appointment Booking Process More Efficient and Maximize Your Profits!

Bluebird Auto Rental Systems is proud to partner with **TimeHighway.com**, a premier real-time, online scheduling service for car dealerships. Convenient and easy to use, it allows busy clients to set their desired reservation or appointment times.

TimeHighway's extremely robust program provides customers with the ability to schedule online appointments 24/7, while providing outstanding service drive management and shop loading for the service department. Integrated with RentWorks and your DMS system, the appointment is transferred seamlessly into the DMS and to RentWorks, which creates the rental/loaner reservation for the customer.

TimeHighway enhances or replaces old telephone-based processes with Internet technologies to improve the effectiveness and availability of booking appointments — and offers new advertising and communication channels for dealerships and their customers.

Customers receive an immediate confirmation email, a courtesy reminder the day before the appointment, email or text notification when the service on the vehicle is complete, and a thank you email once they pick up the vehicle. This allows the Service Department to spend more quality time with customers, thus increasing the Dollars per R.O., and increasing Service Department CSI, customer loyalty and retention.

The bottom line: TimeHighway maximizes available appointment hours and increases revenue!
