

# Eliminate **Double Entry** of Data!

***Let Bluebird's bi-directional interface  
to your ADP Dealership system  
save you time and money!  
(not to mention sore fingers)***

## **Are you doing TWICE THE WORK:**

- **Entering the same CUSTOMER DATA** for both auto rental and dealership customers?
- **Entering the same ACCOUNTING DATA** for both your auto rental system and your dealership system?

***If these are familiar scenarios, then you need  
the Bluebird interface to ADP!***

With this interface, you can look up existing customers in your ADP system, and then transfer their information into RentWorks during the rental process. If you add new customers into RentWorks, they will automatically load into the ADP database.

Upon initial installation, you will enter setup and posting parameters, then General Ledger account numbers (which should match those in ADP). When you post your Daily Business Report, journal entries are created and written to your ADP General Ledger.

*Minimum requirements: Single User RentWorks systems will need an Ethernet network connection to ADP. We highly recommend using Terminal Services for multi-user systems (if not, programs must be loaded on each Client PC). RentWorks version 3.0*

*Call your Bluebird sales rep today for more details.*
