

Do you need a better way to qualify your debit card carrying customers?

Bluebird's new interface to Equifax is the way!

EQUIFAX[®]

Upon opening a rental agreement, your counter agent can, if desired, obtain the customer's credit score from Equifax, one of the leading credit history reporting bureaus.

Equifax will search their database for your customer based on their name and address. If there is no address, you will be prompted for the social security number.

You can enter any script you want the counter agent to read to the rental customer: 1) before the inquiry is made, 2) if the score fails, and 3) if a person cannot be found at all in the Equifax database.

You determine the range of scores which qualify to rent. The rental agent will then receive a message asking whether or not to complete the rental. You can also define how many days to apply that result to future rentals.

You can ignore the Equifax score by using the Manager Override function. However, ALL actions are recorded in the Audit Log.

Please note:

1. You will need to enter into an agreement directly with Equifax in order to use this module.
2. You will have to disclose the fact that you may perform credit checks on the face of your rental agreement.
3. Renters with a home address in Vermont cannot have their credit checked.

This Equifax interface is just one of many new and exciting features included in RentWorks4, the latest version of Bluebird's leading-edge auto rental software.

Call today to find out how RentWorks4 can improve your bottom line.
