

Now available for **RentWorks™**

Insurance Replacement Reservations via the Internet with Insurance Connection Online

Bluebird Auto Rental Systems has partnered with Argo Development Systems to allow you to process Insurance Replacement Reservations.

All you need is an Internet connection from your RentWorks system, and you will be able to use the Insurance Connection. After you sign up, you may download the Insurance Connection Client (ICC), or they will send it to you with the installation kit.

The main screen shows New Rental Requests, as well as current Active Rentals. When the ICC receives new messages from an insurance company, it displays them on the screen. You then have the option to Accept or Decline the request.

If accepted, the reservation flows directly into your RentWorks system. When the customer picks up the vehicle, you report to the insurance company by clicking on the Picked Up button in the ICC, and provide information such as the Rental Agreement number, repair shop name, phone number, and contact. From the ICC, numerous reports are available, such as Daily Rental Status, Due Backs, and Completed Contracts.

For more information, contact Argo Development Systems at 972-278-0090 or visit their web site at www.winrent.com.

Note: The Insurance Connection Module requires RentWorks Version 3, Service Pack 3 and a High-speed Internet Connection (DSL, Cable, Fractional or Full T-1). A Static IP Address is NOT necessary. There must also be a minimum of 20 vehicles in your fleet.
