

Discover The Missing Link.

Is something missing from your auto rental operation?

The Corporate Reservation Link for RentWorks will save you time and money!

The Corporate Reservation Link allows reservations to be received from a centralized reservation center. The information is sent out via a telephone line and is received by an auto-answer modem, which is connected directly to the auto rental computer. When RentWorks receives the reservation, it automatically creates records in the Reservations File.

The Corporate Reservation Link features the ability to generate an audit trail from the reservation transmissions. A hard copy receipt can be printed of the exact image of the reservation transmissions as they are sent from the centralized reservation center. A log is also provided for the purpose of tracking all additions and changes to the Reservations File.

Get the Corporate Reservation Link and discover the savings. Don't miss it!
