

Eliminate **Double Entry** of Data!

Let Bluebird's bi-directional interface to your Reynolds and Reynolds ERA® system save you time and money!
(not to mention sore fingers)

Are you doing **TWICE THE WORK**:

- **Entering the same ACCOUNTING DATA** for both your auto rental system and your ERA system?
- **Entering the same CUSTOMER DATA** for both auto rental and dealership customers?

If these are familiar scenarios, then you need the Bluebird interface to ERA!

Reynolds Certified Interface

With this interface, you can inquire into existing ERA customers as well as add new customers from RentWorks. Upon posting the Daily Business Report (DBR), the completed rental agreement will automatically update into your ERA Rental Sales Journal (0082) where you can review and update the contract.

By setting up the product type, inventory category and profit center in the I=Vehicle Rental Integration Specs in the Rental Sales Journal screen (0874), RentWorks can generate a rental contract and automatically integrate it to ERA. Once the appropriate contract number and rental code are entered in the Rental Sales screen (0082), the information transferred from RentWorks automatically appears on the screen.

Minimum requirements: Single User RentWorks systems will need a network connection to ERA; i.e., the PC running RentWorks must have a network interface card (you cannot simply connect to ERA via a serial port). We highly recommend using Terminal Services for multi-user systems (if not, programs must be loaded on each Client PC). RentWorks version 3.0 and ERA version 4.5
