

Now available for **RentWorks™**

Isn't it about time to donate that old punch clock to a museum?

Make way for the 21st Century...**TimeClock** is here! Fully integrated with RentWorks, version 2.1 and later, TimeClock is the automated employee time clock from Bluebird Auto Rental Systems. It's here to make your business run a little smoother...and your life a little easier.

TimeClock Features:

- Eliminates the need for the traditional time clock. Now, instead of punching in, an employee can simply log in, on-line through your computer system.
- Keeps track of the employee's time during any given pay period, whether it is a weekly, bi-weekly, semi-monthly or monthly payroll cycle.
- Records all transactions for each employee by date, time and type.
- For added security, managers have the ability to override or correct any entries.
- Once information is approved, it can be posted automatically to Microsoft Excel.

Now isn't it about time to get TimeClock?
