Two scoops of ice cream? Good.

Entering data twice? Not so good.

Eliminate Double Entry of Data!

Let Bluebird's interface to your Auto/Mate Dealership System save you time and money!

If you are currently entering the same customer data for both auto rental and dealership customers – as well as the same accounting data – then you need the Bluebird interface to your Auto/Mate DMS. All data exchanged between your DMS and RentWorks is delivered instantly and securely. And cuts your data entry time in half!

With this interface, you can look up existing customers in your Auto/Mate system, and then transfer their information into RentWorks during the rental process. If you add new customers into RentWorks, they will automatically load into the Auto/Mate database.

Upon initial installation, you will enter setup and posting parameters, then General Ledger account numbers (which should match those in Auto/Mate. When you post your Daily Business Report, journal entries are created and sent to the Auto/Mate General Ledger via web services, but will be in a pending status. You then have the opportunity to review the journal entries before actually posting them.

Stop doing twice the work!
Call your Bluebird sales rep today for more details.
