Are Your File Cabinets Overflowing?

Going Paperless Is Now Possible with the Electronic Signature Pad for RentWorks!

Features:

- Large screen electronically captures your customer's signature upon check-out.

- You can also prompt to accept or decline additional coverages.

- Images are stored electronically — eliminates the need to save hard copies.

- All necessary verbiage can be programmed to display on the screen in order to meet legal requirements.

Minimum system requirements: RentWorks 4.0, release B9 and WebClient (Remote Desktop Protocol/RDP via Terminal Services will NOT work with version 4 Signature Pads). One signature pad per workstation, plus the appropriate user level software license.

Throw out your file cabinets and go paperless today!
